Education

National Institute of Technology, Rourkela

Bachelor of Technology, Civil Engineering (CGPA - 7.74)

August 2023 – Present

Rourkela, Odisha

Prabhujee English Medium School, Bhubaneswar

AISCCE– CBSE, Science (PCMB) (Percentage- 94%)

May 2022

Bhubaneswar, Odisha

Prabhujee English Medium School, Bhubaneswar

AISSE– CBSE (Percentage - 93.4%)

May 2020

Bhubaneswar, Odisha

Relevant Coursework

- Machine Learning
- Python Programming
- Probability & Statistics
- Data Analysis & Visualization

Work Experience

Pradivya Software Pvt Ltd.

Data & Operations Analyst Intern

May 2026 – July 2026

Noida, Delhi NCR

- Collaborated with clients, engineering teams, railway officials, and field vendors via written and verbal communication to align data workflows and AI model validation with deployment timelines.
- Engineered a data engineering pipeline to extract, validate, and transform 40,000+ railway inspection records, applying domain knowledge to build KPI dashboards that improved reporting efficiency from ~75% to ~95%.
- Labeled and quality-checked 40,000–50,000 image frames supporting training of a deep-learning-based OCR fault-detection system, improving coach-number recognition accuracy from 30–40% to ~95%.

Projects

SwiftBasket — Quick-Commerce SQL Analytics

Python, PostgreSQL, SQL

July 2026 – Ongoing

GitHub

- Engineered an 8-table quick-commerce dataset using Python and AI-assisted prompt design; designed and loaded a PostgreSQL database for data analysis.
- Solved 40/50 business SQL problems across 8/10 modules using multi-table joins, CTEs, window functions, and aggregations for inventory, logistics, and customer analysis.

BRD → Test Case Copilot

Python, Google Gemini API, Streamlit

June 2026 - July 2026

GitHub

- Designed an end-to-end AI solution using Google Gemini API and AI-assisted development (Claude, GitHub Copilot), applying prompt design to extract BRD requirements and automate test-case generation.
- Reduced drafting time from 45–60 min to ~2 min, validating 8/8 mapped test cases; implemented retry/backoff logic in Python and deployed via Streamlit with CSV export.

IPL Win Predictor

Python, Pandas, Scikit-learn

October 2025

GitHub

- Built a Machine Learning Logistic Regression model on IPL data (2008–2024), achieving 81% accuracy; deployed as a web app.

Achievements/Certifications

McKinsey Forward Program | J.P. Morgan Quantitative Research Job Simulation

Technical Skills

- **Languages:** Python, SQL
- **Data Engineering & Analytics:** Data Engineering, Data Extraction, Statistical Analysis, Predictive Modeling, KPI Dashboarding, Data Visualization
- **AI/ML:** Artificial Intelligence (AI), GenAI, Machine Learning, Deep Learning, Prompt Design, LLM APIs
- **Tools:** MS Excel, Power BI, PostgreSQL, Google Colab, Streamlit, GitHub, Claude, GitHub Copilot

Leadership & Responsibilities

FitCon

Treasurer — Event Operations & Budget Management

October 2023 – April 2025

NIT Rourkela
